Projects Worked on:

Project #1

Name: US Banking products.
date

Sep 2021 – till

Products: Work Management, New Account Opening, Money Movement

Role: Software QA Associate

Team Size: 10

App Type: Web Based

Tools & Technologies Used: Selenium WebDriver using Qmetry, Cucumber, Page Object Model, IntelliJ, Karate, Postman

Description:

New Account Opening Is a tool where user/client can open an account successfully and the opened account will go for additional reviews if the account has triggered exceptions

Project #2

Name: US Health Insurance Products

May 2019 – Sep 2021

Products: MemberwoRx, Membership and Billing

Role: Software QA Associate

Team Size: 8

App Type: Web Based

Tools & Technologies Used: Selenium WebDriver using Serenity, Cucumber, Page Object Model, IntelliJ, Karate, Postman **Description:**

MembewoRx is an enrolment, eligibility and premium billing software solution. The tool has been designed to enable automation and efficiency for these health plan processes. The tool is built using the microservices development methodology to build and support each individual business function. The individual business microservices are integrated and designed for flexibility and maintain features to support multiple lines of business and product types

MemberWoRx can be used to provide automated support for individual, group enrolment across multiple business segments (e.g., Commercial, Marketplace Medicare Advantage, and Managed Medicaid programs). The tool is designed to support standard 834 membership enrolment imports, adds, changes, and terminations via both batch and real-time approaches. MemberWoRx uses real-time API data exchanges for integration with workflow, claims and correspondence processes and tools

Responsibilities:

- Analysed the functional requirements provided by the client
- Prepared Test Cases by covering the product functionality
- Gather requirements and analyse and identify best automation framework
- Involved in development of automation framework
- Involved in automation test script review
- Involved in test case Signoff meetings
- Coordinated with development team for issues and resolution of defects
- Review the feedback from Developers and Perform Regression Testing
- Attended weekly status meeting and provide detailed status report

Fields of Interest:

- Machine Learning
- Data Science
- Automation Tools
- Coding

Skills:

- **Languages:** Java, Python
- **Framework:** Selenium tool with serenity & Qmetry, Karate for API, Spring Boot for web application
- **Database system:** SQL, SQLite

Hobbies:

- Music
- Travelling

Declaration:

I hereby declare that the above information provided by me is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned
